PROBLEM STATEMENT

Prakash-kaka can hear the bill. Nobody tells him what to do.

68, cataract, reads only Marathi. The MSEDCL bill, a new medicine strip and bank SMSes arrive in English jargon and small print while his children are at work. He guesses, misses due dates, takes expired medicine, or trusts a fake 'power will be cut tonight' SMS. Google Lens reads the text aloud, but only if he knows what to ask.

Elders need a decision they can trust, not text read aloud.

PROPOSED SOLUTION

VAACHAK वाचक

A voice-first reader that tells elders what to do, and keeps them safe.

Instead of reading text aloud and waiting for the right question, Vaachak turns any bill, medicine strip, notice or message into one spoken action card: what it is, what to do, by when, how much, and the danger.

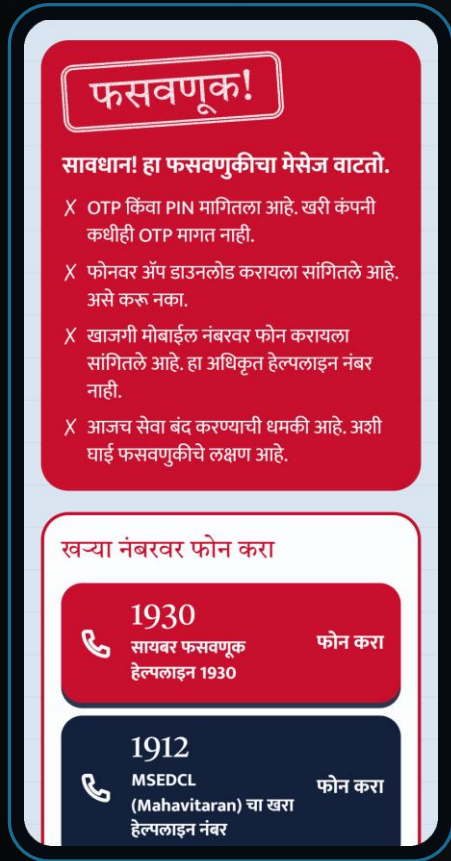

KEY IDEA

Vaachak turns a document from text read aloud into a decision: **what to do, by when, and what is dangerous.**

BUILT & RUNNING TODAY

LIVE PROTOTYPE

PROTECT

Fake power-cut SMS

Red scam card, one tap to 1930

VERIFY

MSEDCL bill

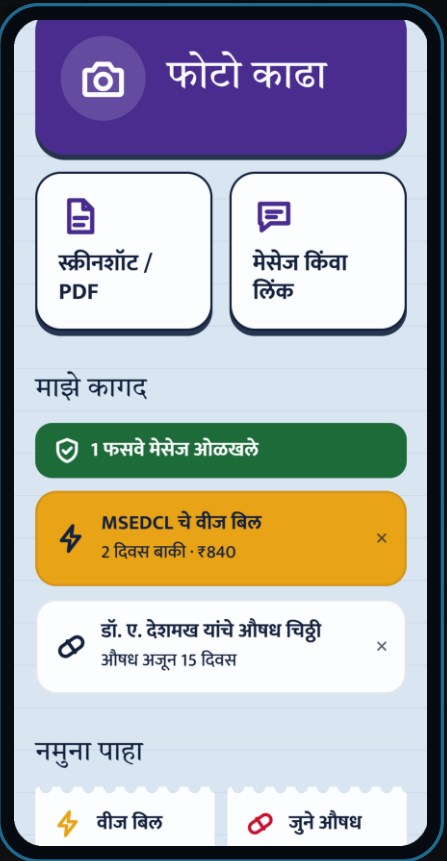

₹840 by 10 Oct, found in the print

REMIND

3 medicines

One schedule each, into the calendar

REMEMBER

My papers

What is due, scams caught

PLATFORM & ACTIONS

Serverless in Mumbai; acts in one tap.

Node.js

Vercel

WhatsApp

Calendar

System Diagram

USP

Acts, not just reads

Pay, remind, call 1930 or ask family in one tap.

Scam shield for India

Fake power-cut SMS, KYC, OTP, AnyDesk, personal UPI.

Works offline

On-phone OCR, 50 medicines and the same safety rules.

Never guesses

₹ and date checked against the print; unsure means "ask someone".

Looks after you

Whole-course dose reminders, due dates in My papers, cheaper generic.

Your language & voice

Marathi, Hindi, English; spoken tour; giant UI.

Future Scope

Phase
1

Live today

Bills, medicines, scams and reminders in Marathi, Hindi, English.

Phase
2

22 languages + WhatsApp bot

Forward any document to Vaachak; Sarvam / Bhashini voices.

Phase
3

Family & payments

Caregiver alerts for due bills and scams; BBPS verified payments.

Future

Fully offline Vaachak

On-device AI model; government-scheme notices as checklists.
